DETAILED ACTION

1. Claims 1-27 are pending and under consideration.

Drawings

2. This formal drawings filed with the application have been reviewed by the Draftsperson and approved.

Claim Rejections - 35 USC § 112

- 3. The following is a quotation of the first paragraph of 35 U.S.C. 112:
 - The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.
- 4. The following is a quotation of the second paragraph of 35 U.S.C. 112:
 - The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 5. Claims 2-6 are rejected under 35 U.S.C. 112, second paragraph, because claim 2 recites the limitation "the sodium sulphate" in line 3. There is insufficient antecedent basis for this limitation in the claim because claim 1, from which claim 2 depends, does not recite "sodium sulphate", but only "sulfates" or "sodium" Claims 3-6 depend from claim 2.
- 6. Claim 3 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Application/Control Number: 09/701,760

Art Unit: 1645

Claim 3 recites "The mixture of claim 2, further comprising: homogenizing the admixture by high intensity homogenization". It is unclear how homogenization adds more components to the mixture of claim 2. It appears to the examiner that the claim more likely should read "The method" of claim 2.

Claims 18-27 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for 7. failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 18 recites "sporulating the separated oocysts by the method of claim 14". However, claim 14 is drawn only to purification and recovery of encysted protozoa. Claims 19-27 depend from claim 18 and do not recite any sporulation methods.

8. Claims 15-17 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims are drawn to a method which eliminates "unwanted" microbiological growth. However, neither the claim nor the instant specification defines what is "unwanted". Therefore, the claims are indefinite.

9. Claims 1-27 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims are drawn to a method for the purification and recovery of encysted protozoa. None of the claims indicate which protozoa are encompassed by the claims, i.e., is the method for all protozoa which encyst? The specification also does not define the metes and bounds of which protozoa are included, except for possible microorganisms listed in Fig. 2 or the statement on page 9 that the encysted protozoa "can be" avian coccidial oocysts listed on lines 7-8.

Claim Rejections - 35 USC § 102

10. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 11. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by O'Grady et al (Can. J. Comp. Med., 44:148-154, April 1980).

The instant claim is drawn to a method for the purification and recovery of encysted protozoa, comprising separating the protozoa by a salt flotation process where the salt comprises nitrates.

O'Grady et al teach a sodium nitrate flotation solution for separation of coccidial oocysts (Abstract; Materials and Methods, pp. 149-150).

12. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Davis et al (U.S. Pat. No. 4,544,548, 10/1985).

Application/Control Number: 09/701,760

Art Unit: 1645

The instant claim is drawn to a method for the purification and recovery of encysted protozoa, comprising separating the protozoa by a salt flotation process.

O'Grady et al teach a salt flotation process (Col. 7, lines 15-37) for recovery and purification of oocysts.

13. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Fuller et al (*J. Protozool.*, 36(2):143-146, 1989).

The instant claim is drawn to a method for the purification and recovery of encysted protozoa, comprising separating the protozoa by a salt flotation process.

Fuller et al teach a salt flotation process (Abstract; materials and methods, page 143) for recovery and purification of oocysts.

Claim Objections

14. Claims 2-14 and 18-27 are objected to because the claims depend from a rejected claim 1.

Appropriate correction is required.

Conclusion

- 15. No claims are allowed.
- 16. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Rodney P. Swartz, Ph.D., whose telephone number is (703) 308-4244. The examiner can normally be reached on Monday through Thursday from 5:30 AM to 4:00 PM EST.

Art Unit: 1645

If attempts to reach the Examiner by telephone are unsuccessful, the examiner's supervisor, Lynette F. Smith, can be reached on (703)308-3909. The facsimile telephone number for the Art Unit Group is (703)308-4242.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the group receptionist whose telephone number is (703)308-0196.
